## WEST NOTES

Mr. and Mrs. Ted Sissons of Clive and Mr. and Mrs. H. H. Hogggood attended the opening of the new wing of the Vulcan hospital on Wednesday of last week.

Mr. and Mrs. Arnold Hogg spent Sunday with the latter's parents, Mr. and Mrs. C. Wilson, west of Cremona.

Mrs. O. Krebs left last Friday with Mr. and Mrs. A. Esler to spend the next two weeks visiting in Indiana, U.S.A.

Mr. and Mrs. O. Thompson were Banff visitors on Sunday.

Elkton ball team lost to Sundre on Sunday on the former's diamond, mostly through errors.

A disastrous hail storm hit the Inverness district on Saturday afternoon. It was accompanied by a terrific wind and almost a cloud burst of rain and gardens and crops were damaged extensively. Some hail fell in the Elkton district on Monday afternoon, but not enough to do much damage. It also was accompanied by lots of rain.

Mr. and Mrs. R. Befus were Leduc and Edmonton visitors last week. Mrs. J. Hogggood left Sunday evening to attend Farm Women's Week in Oids.

Mrs. J. Befus of Calgary visited with her sons last week.

Mr. D. Hogggood attended the electrical meeting in Red Deer last Thursday.

It is with deep regret that we report that Mrs. A. McInnes has been taken to the hospital, and we sincerely trust that her stay there will be brief.

## AIRMEN AND BEAR BOTH FRIGHTENED

Graduates of the R.C.A.F.'s parachute school at Jasper, Alta., are laughing about this one—and wondering who was scared the worst. LAC T.A. Rycroft recently made a parachute jump into the bush. As he neared the tree tops, he broke into a cold sweat as he saw a big brown bear directly below. But the bear was just scared by the apparition and lunged away into the forest before Rycroft landed.

## LETTER TO THE EDITOR

## Manitoba Flood Relief Fund Closes July 15

The Editor, Didsbury Pioneer.

Dear Sir: On May 26th we wired to you seeking your co-operation in connection with the Manitoba Flood Relief Fund. At that time the Red River flood was at its height and many thousands of residents of the Red River Valley area had been driven from their homes.

The flood waters have now receded and business life of the community is back to normal. As a result of the generous help given by the weekly newspapers of Canada in support of the Fund, along with the assistance given by the press and radio of Canada and some thousands of local committees which have been giving their energetic help to the Fund, we now have received contributions of more than \$6,500,000 in cash and goods to the value of several hundreds of thousands of dollars, which goods have been directed to the Red Cross and Salvation Army for distribution to flood victims.

The generous contributions made to the Fund will enable us to carry out our objective of fully compensating flood victims for loss of furniture, home furnishings and personal belongings destroyed or damaged by the flood waters. Approximately 1,000,000 persons have contributed to the fund. These contributions have ranged from 25c up to \$360,000 received from the Line Elevators Companies and the grain trade.

The Manitoba Flood Relief Committee has decided to bring the campaign to a close on July 15th. In ending this campaign the Committee and the flood victims whose homes will be restored by the Fund, wish to express to The Didsbury Pioneer deep appreciation for all that you have done in enabling the Fund to reach its objective. They also ask that through your columns they be permitted to convey their heartfelt thanks to the citizens of your district who have contributed so generously and to those who have worked so diligently in local efforts on behalf of the Fund.

We feel that the contributors to the Fund will be interested in knowing that the raising of the Fund was accomplished entirely with voluntary help. As a result of all connected with the Fund having contributed their time and efforts, the cost of raising this large sum of money will be less than one-half of one per cent of the amount collected. We believe that this constitutes a low cost record in the raising of such a large Fund. We would appreciate it if, through your columns you request that any local committees operating on behalf of the Fund forward any contributions on hand as soon as possible after the closing date of the campaign.

Sincerely yours,  
CECIL LAMONT,  
Honorary National Organizer,  
Manitoba Flood Relief Fund.

## DAILY VACATION BIBLE SCHOOL AT EVANGELICAL CHURCH

Beginning July 17 at 9:30 a.m., all children up to 14 years of age are invited to attend Daily Vacation Bible School at the Evangelical church for a course in Bible instruction and handwork, conducted by the Misses Jane Young and Lillian Zepp of Hillcrest Christian College. These teachers are experienced in this kind of work and would be pleased to meet all children interested, so come along boys and girls for a good time in the Evangelical church, Didsbury.

## REDEEMER LUTHERAN CHURCH VACATION BIBLE SCHOOL

The annual Vacation Bible School of Redeemer Lutheran Church will be held in the basement of the church from Monday, July 17, to Friday, July 28. Classes will be from 9:30 till 12, and from 1 to 3 p.m. Arrangements have been made to divide all children attending into various age groups. Special materials have been ordered for each age group. This material will not only hold the interest of the children, but also impart the fundamental truths of Scripture to them.  
Acting as teachers at the V.B.S. will be Erna Reinhardt, Alvina Jans, Mrs. E.B. Fox and Rev. E. B. Fox. Full use of the latest aids in visual education will be used. All children in the community are welcome to attend the V.B.S.

## HEALTH UNIT REPORTS

We have been having a busy time these last few weeks trying to keep up our program of examining school children. This work has suddenly come to an end with the onset of the summer holidays, and we have not been able to detect any forceful protests or objections on the part of the school children at this state of affairs.

We ourselves are not altogether sorry either. For although much work remains to be done during the remaining good weather months when schools reassemble, in the meantime we will have an opportunity of devoting our energies to other fields. It seems an opportune moment to talk of the regulations governing communicable diseases.

It is not our habit in the ordinary course of events to take notice of anonymous letters, but the one we have before us now which has been sent to us by "A Health Seeking Citizen" may be quoted as having some bearing on this question of communicable disease regulations. Our friend, who appears so afraid to give us his own name, writes as follows: "I am sure there must be some rules and regulations concerning communicable diseases and their quarantines. Three weeks ago D. D. broke out with scarlet fever, and since J. and Mrs. D. have taken it. They have been allowing their children to play with others, ours included. They told no one and there was no quarantine sign. They have been going out. I think this is quite terrible. The least they could do was to tell a person before the 3 weeks' time . . . Can't something be done in such cases. Are not such communicable diseases to be reported at once? I understand this is the purpose of the Health Unit, but the purpose certainly cannot be fulfilled with such things going on."

Yes, dear friend and health seeking citizen, quite a lot can be done and ought to be done, but was not done in this case. We, at the Health Unit end are only too anxious to investigate all suspected cases of communicable diseases and to apply the relevant regulations, but you will agree we can do nothing unless the case gets reported to us, can we?

But, dear friend, you apparently and very obviously did know something about these cases. Although of course we will not tell your word for it that they were scarlet fever. But why did you not telephone us and tell us of the names and addresses of the children in question, and of your suspicions? Why did you not even in such an unpleasant thing as an anonymous letter give us the address of the D.'s? How are we to find them otherwise? So it looks, dear friend, as if you yourself are as much to blame as anyone in this matter. Are you not? You certainly have not helped us, have you dear anonymous friend? Or do you think we can deal with these cases from afar? Unfortunately we cannot. Nor is there any witchcraft about it, or mental telepathy, or radiance, or any kind of mumbo-jumbo. The plain truth of the matter is that we are very human and matter of fact, and the only way we are able to deal with communicable diseases is for a member of the family, or a friend, or a doctor to telephone or write us, or even come in person and tell us. There is no magic about it at all. As soon as we have been told the responsibility becomes ours and we tackle the problem.

According to the Public Health Regulations it is the duty of the householders, of doctors and of teachers to advise us of any malady which they have encountered in the course of their daily routine, and which they think may be of a communicable disease. Householders and doctors are requested to advise us within twelve hours, but teachers are given a little more latitude, provided the little patient is sent home immediately; and he may not return to school unless he has a doctor's certificate to say that he is free from any communicable disease.

Let us briefly state here what the isolation and quarantine regulations are with respect to the principal communicable diseases. Isolation refers to the patient, while quarantine refers to the contacts.

Chickenpox, 8 days isolation, no quarantine.

Measles, 10 days isolation, 14

## BACKSLIDING COW NOTE

Backsliding Canadian cows are causing anxious glances at the activities of the U.K. firm of Gascoignes Limited, exhibiting at the C.I.T.F. The firm have developed a multi-milker called the "Mobilactor" (Junior model the Mobillette) which doesn't content itself with milking but measures each cow's daily output as well. Both the 4-cow and 2-cow units come either with built-in power supply or adaptable for any form of Canadian power source.

The machine milks, weighs (in pounds), cools and "cans" four cows at a time and is portable and simple to operate.

NOTES**W.K. Snyder,

2-4-D chemical is as near fool proof as the manufacturers can make it, but it still requires some intelligence on the part of the operator in applying it in order to attain the desired results. Acid content is not clear to many people. It is explained in this way:

There are 100 fluid ounces in every gallon. The acid content as shown on the container refers to the number of ounces of pure 2-4-D acid in the gallon of chemical. For example, if a gallon of chemical contains 64 ounces of acid, the remaining 36 ounces are composed of various ingredients (oils, alcohols, ester, etc.). These ingredients, the emulsifying, sticking, wetting and penetrating agents dissolve and keep the 2-4-D acid in suspension, and will readily mix with water which is used as the carrying agent. When we refer to ounces of acid per acre we mean the number of ounces of 2-4-D acid in the gallon of chemical, not the ounces of chemical as it comes from the can.

If you use a 64 acid content brand and want to apply 8 oz. acid per acre, one gallon of chemical will treat 8 acres. In the event an 80 oz. acid content is used, one gallon applied at the same rate as above will treat 10 acres.

Chemical varies in price per gallon due to the different acid content. To determine the cost per acre, divide the price per gallon by the number of acid ounces in the gallon (this will give the cost per ounce) and multiply by the number of ounces per acre you wish to apply.

With the cost of chemical greatly reduced this year, a rate of application can be used that will kill the weeds at a reasonable cost per acre to the farmer.

STRANG-SCHMIDT

The Air Base Chapel at Whitehorse, Y.T., was the scene of a pretty wedding Wednesday evening, June 30, when Miss Hazel Irene Schmidt and Mr. Gerald Keith Strang were united in marriage at a double-ring ceremony, with Padre G.S. Fraser officiating.

The bride, given in marriage by Mr. Jack Palmer, wore a white taffeta dress, fashioned with lace yoke, and full net skirt. Her head-dress was a tiarra composed of Frenched carnations and her corsage was tallman roses.

Attending the bride was Mrs. Jack Palmer, who wore a dress of powder blue net over taffeta. Her head-dress was a coronet of pink Frenched carnations, and her corsage was pink roses.

Mr. Lester Bell attended the groom.

A reception was held at the Men's Recreational Centre where eighty-five guests attended. The bride's table was decorated with a three-tier cake, banked with mixed spring flowers. Brigadier A. B. Connolly proposed the toast to the bride, which was ably responded to by the groom.

After a short honeymoon in Juneau, Alaska, the happy couple will make their home in Whitehorse.

*Better with  
Butter*

Yes, everything's BETTER WITH BUTTER... because butter alone is made from the rich cream of fresh, pure milk — nature's best, most complete food. Only butter can add that distinctive, wholesome butter flavour and goodness.

## Be Proud Of Your Business

Modern advertising is a necessity to hold and build business. Be proud of your business, of the goods you have to sell, of the services you have to offer in your particular line. Show the progressive spirit and the desire to serve by advertising. Do not hide your light under a bushel—proclaim far and wide who you are and what you have to sell and where your place of business is, for public memory is short, and advertising is a powerful aid to all types of businesses. Moreover, people as a general rule shop where they are invited.

### IRRIGATION ADVANCES

Appropriations totalling \$7,719,500 have been made by the House of Commons for irrigation development in Western Canada. In the course of the debate W.D. Wiley, member for Medicine Hat, said Canada is lagging behind other countries in the development of irrigation projects. This country, he said, has only one million acres under irrigation compared with 8 million acres in Russia, 15 million in the United States, 47 million in China and 60 million acres in India.

### GIVE HIM ONE

Howard Halliday was busy serving a customer, but he noticed a small boy standing near an open box of cookies.

"Now then, my lad," said Howard, "what are you up to?"

"Nothing?" Well it looks as if you were trying to take a cookie."

"You're wrong, mister, I'm trying not to."

### COW ELECTROCUTED BY GARAGE CONNECTION

Willis A. Fawns of Stirling, Alberta, recently found one of his valuable dairy cows on the floor of his garage, a broken plug and electric cord in its mouth. The straying cow had electrocuted itself by biting into a light cord connected to an outlet in the garage.

## Advice to Cheese Factory Patrons

Cheese factory patrons are urged by the Dairy Branch not to send milk to the cheese factory from cows being treated for mastitis. This applies also for a period of three to four days after the last treatment of penicillin or any other drugs of a similar nature.

From milk containing these drugs the factory has no chance to manufacture top quality cheese. Top quality cheese brings top price and the bonus which is returned to factory patrons.

The Director of Veterinary Services has instructed that only the milk from quarters being treated needs to be held out from your milk supply going to the cheese factory. Milk out these quarters first. It can be used for feeding livestock on the farm. By following these instructions you can help your factory turn out a top quality product.

The returns you receive from your factory depend on the price and quality of cheese sold. Your co-operation will also help to maintain Alberta's reputation for quality cheese.

A few subscribers are getting too far in arrears for us to carry them and these will be taken from our list after this issue.

**FASTER GROWING PIGS**

The University of Alberta is experimenting with an animal protein containing a newly discovered vitamin (B-12) which may result in the faster production of pork. When added to the diet of little pigs this new compound is said to result in vigorous growth and the shortening by one month of the period during which the animals reach maturity.

**Individual Hands**

IT is individual hands like these which have built this nation. Working in a system of Free Enterprise they have guided Canada to the high standard of living our citizens enjoy today.

With faith in the future men and women work more eagerly. They know their individual initiative and enterprise will produce its worthwhile reward. The thousands of well established farms throughout Alberta justify this faith. They also justify the system of Free En-

terprise which makes them possible. These farms today belong to free men and women. But they will remain so only as long as men and women treasure the right to dream, to hope and to plan; and only as long as you and your neighbors value the privilege that enables your individual enterprise to make your dreams, hopes and plans come true.

Calgary Power Ltd., with its many shareholders, has pioneered with you in building Alberta. Sharing your faith in Alberta's future, Calgary Power plans and builds for the years ahead.
